Our Expertise

- We conduct clinical, social and behavioural trials, and implementation science research.
- Our research is conducted by an experienced multi-disciplinary team including clinical, laboratory, pharmacy, social science, data, and community engagement staff.
- Our research activities are supported by an operations team that ensures studies are implemented efficiently, compliantly, and on schedule.
- We provide technical assistance, partnering with various stakeholders to affect policy change and enhance best practice.
- We work with diverse partners, collaborators and donors, including local and internationally based universities and research centres.
